Preface

The cultivation of fruit and berry crops is one of Ukraine's traditional agricultural sectors, with significant potential due to favorable soil and climatic conditions that allow for the production of various types of fruits and berries. The sector plays an important role in the economy, supplying raw material for industrial processing. Despite the war and its consequences, the berry industry continues to expand, increasing production and creating opportunities for export.

A methodological note is essential. Official statistics (State Statistics Service, SSSU) record only the registered («white») part of the sector, while a large share of berries in Ukraine is grown by households and small, non-reporting farms. As a result, official figures substantially understate actual output. For the 2025 season, registered production of the main berry crops amounted to only about 99 thousand tons. Based on general industry knowledge and accounting for the unregistered segment, the Ukrainian Berries Association estimates real berry production in 2025 at approximately 165.9 thousand tons.

Real production by crop (association estimate, 2025):
- Raspberries and blackberries — approximately 80 thousand tons (about 48% of the total) and now the largest berry crop in Ukraine, driven by strong demand for frozen raspberry for export. Blackberry remains a niche product that is gradually gaining momentum, especially for processing. Main growing regions: Volyn, Rivne, Ivano-Frankivsk, Chernivtsi, and Zakarpattia.
- Garden strawberries (strawberries) — approximately 44 thousand tons (about 27%). Main regions: Kyiv, Vinnytsia, Kherson, and Lviv.
- Currants — approximately 20 thousand tons (about 12%).
- Blueberries — the most dynamic segment, approximately 14 thousand tons (about 8%). Main cultivation areas: Zhytomyr, Kyiv, Volyn, and Rivne.
- Other berries — approximately 7.9 thousand tons (about 5%).

Total — approximately 165.9 thousand tons.

Estimated planted areas (2025). Because official area statistics also cover only the registered segment, real areas are estimated indirectly: real production is divided by the average yields reported by the State Statistics Service for 2025 (assuming unregistered plantings yield broadly in line with registered ones). On this basis, the estimated real fruit-bearing areas are:
- raspberries/blackberries — about 12.8 thousand ha (official registered fruit-bearing area: about 4.9 thousand ha, i.e. the real area is roughly 2.6 times larger);
- strawberries — about 6.9 thousand ha;
- blueberries — about 5.0 thousand ha of fruit-bearing area; including young, not-yet-bearing plantings the total planted area is higher, on the order of 6 thousand ha;
- currants — about 3.0 thousand ha.

Together these four crops occupy an estimated 27.6 thousand ha of fruit-bearing area.
Note on 2026: official annual production and area statistics for 2026 are not yet published (SSSU releases them after the year ends). Within-season dynamics for 2026 are tracked separately through foreign-trade (export) data.

Sincerely,
Minister of Agrarian Policy and Food of Ukraine
Taras Vysotskyi

Dear Friends,

SOURCES AND METHOD
- Yields and official (registered) production/areas: State Statistics Service of Ukraine, dataset «Areas, harvests and crop yields», 2025 (all categories of holdings, all land). Average yields used (fruit-bearing area): raspberries/blackberries 6.27 t/ha; strawberries 6.38 t/ha; currants 6.70 t/ha; blueberries 2.82 t/ha.
- Real production figures: Ukrainian Berries Association estimates (expert assessment including the unregistered household/small-farm segment).
- Estimated areas = real production / official yield. These are indicative estimates, not official statistics, and should be presented as association estimates.

Sincerely yours,
Iryna Kukhtina, President
of the Ukrainian Berries Association

General information about Ukraine

Official Name: Ukraine (UA)

The political system: Ukraine is a unitary democratic republic with a semi-presidential system. State power is divided into legislative, executive and judicial branches. The President is the Head of State and is elected by citizens for a five-year term. The Verkhovna Rada is the national parliament, while the Cabinet of Ministers is the highest body of executive power.

Area: 603,628 km^2

Population: 38 980 376* (August 2025 est.)

Geographical location: Geographical location: Ukraine is situated in the south-east of Europe. It borders on Belarus, Moldova, Slovakia, Hungary, Poland and Romania.

Official language: Ukrainian

Religions: Orthodox Christianity, Greek-Catholic Christianity, Catholicism, Islam

Major cities: Kyiv (the capital), Odesa, Lviv, Kharkiv, Dnipro

Berries Export Dynamics (2020 - 2025)

(thousand metric tons)

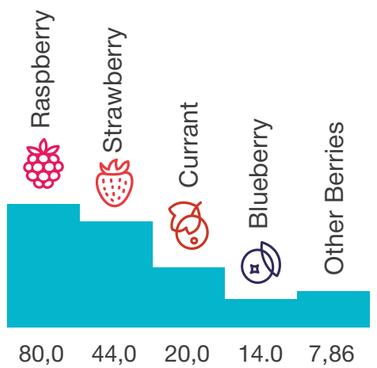

Berries Export Volume (2025)

(thousand metric tons)

Berries Production Volume (2025)

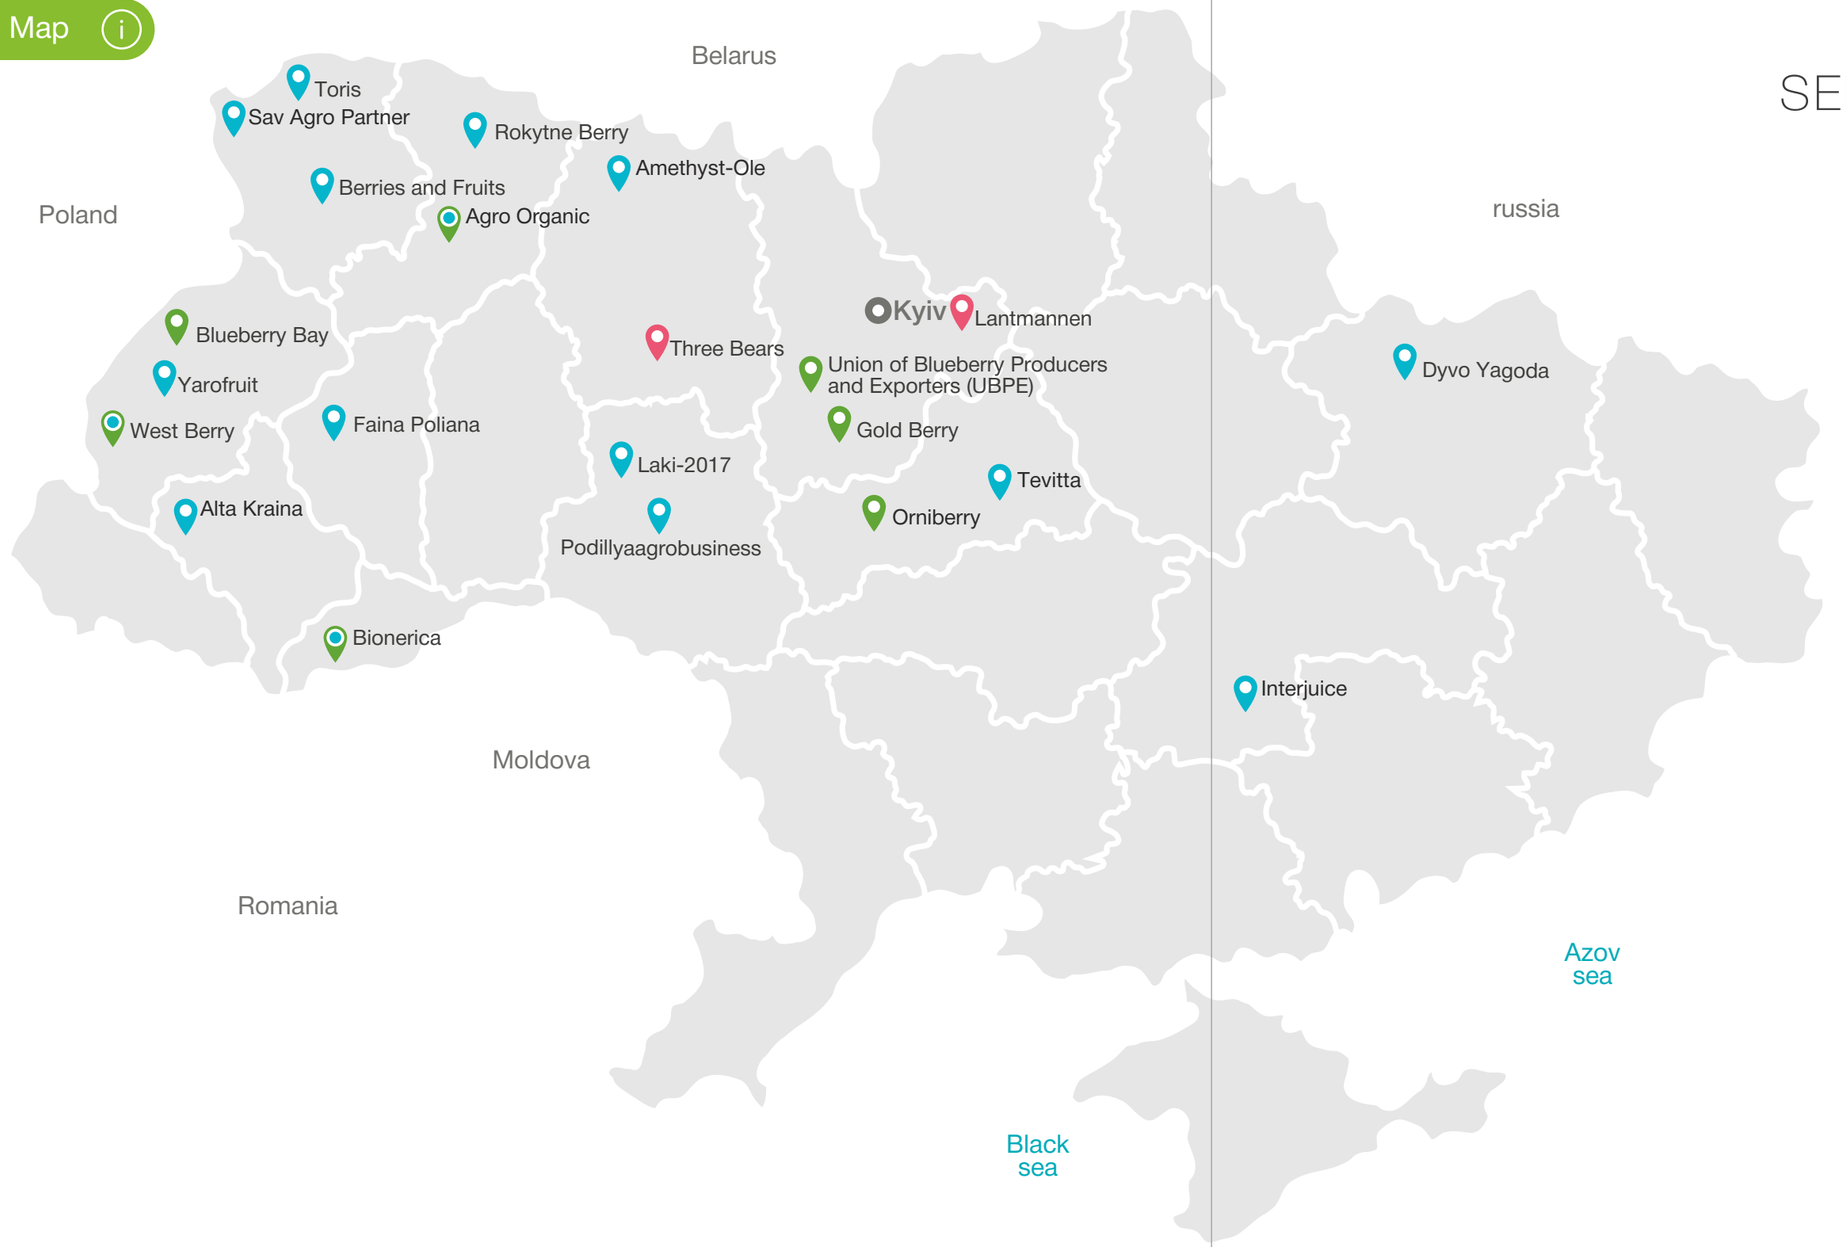

Overview of the Ukrainian Berry Market — 2025

Ukrainian producers offer a wide range of wild and cultivated berries. Frozen raspberries lead in export growth, blueberry exports are expanding significantly, and production of strawberries and currants remains.

2024, Ukraine exported a record 65,000 tons of frozen raspberries, making the country a world leader in net exports of this product. Blueberry exports in 2024 reached 5,000 tons, an increase of approximately 33% compared to the previous year. According to industry and trade data: Exports of frozen fruits and berries from Ukraine in 2024 totaled around 100,58 tons, indicating significant growth in the sector. Fresh berry exports (e.g., strawberries, currants, raspberries) remain much smaller in volume compared to frozen berries. Comprehensive data combining fresh and frozen exports for all berry types in 2024 are less consistently published.

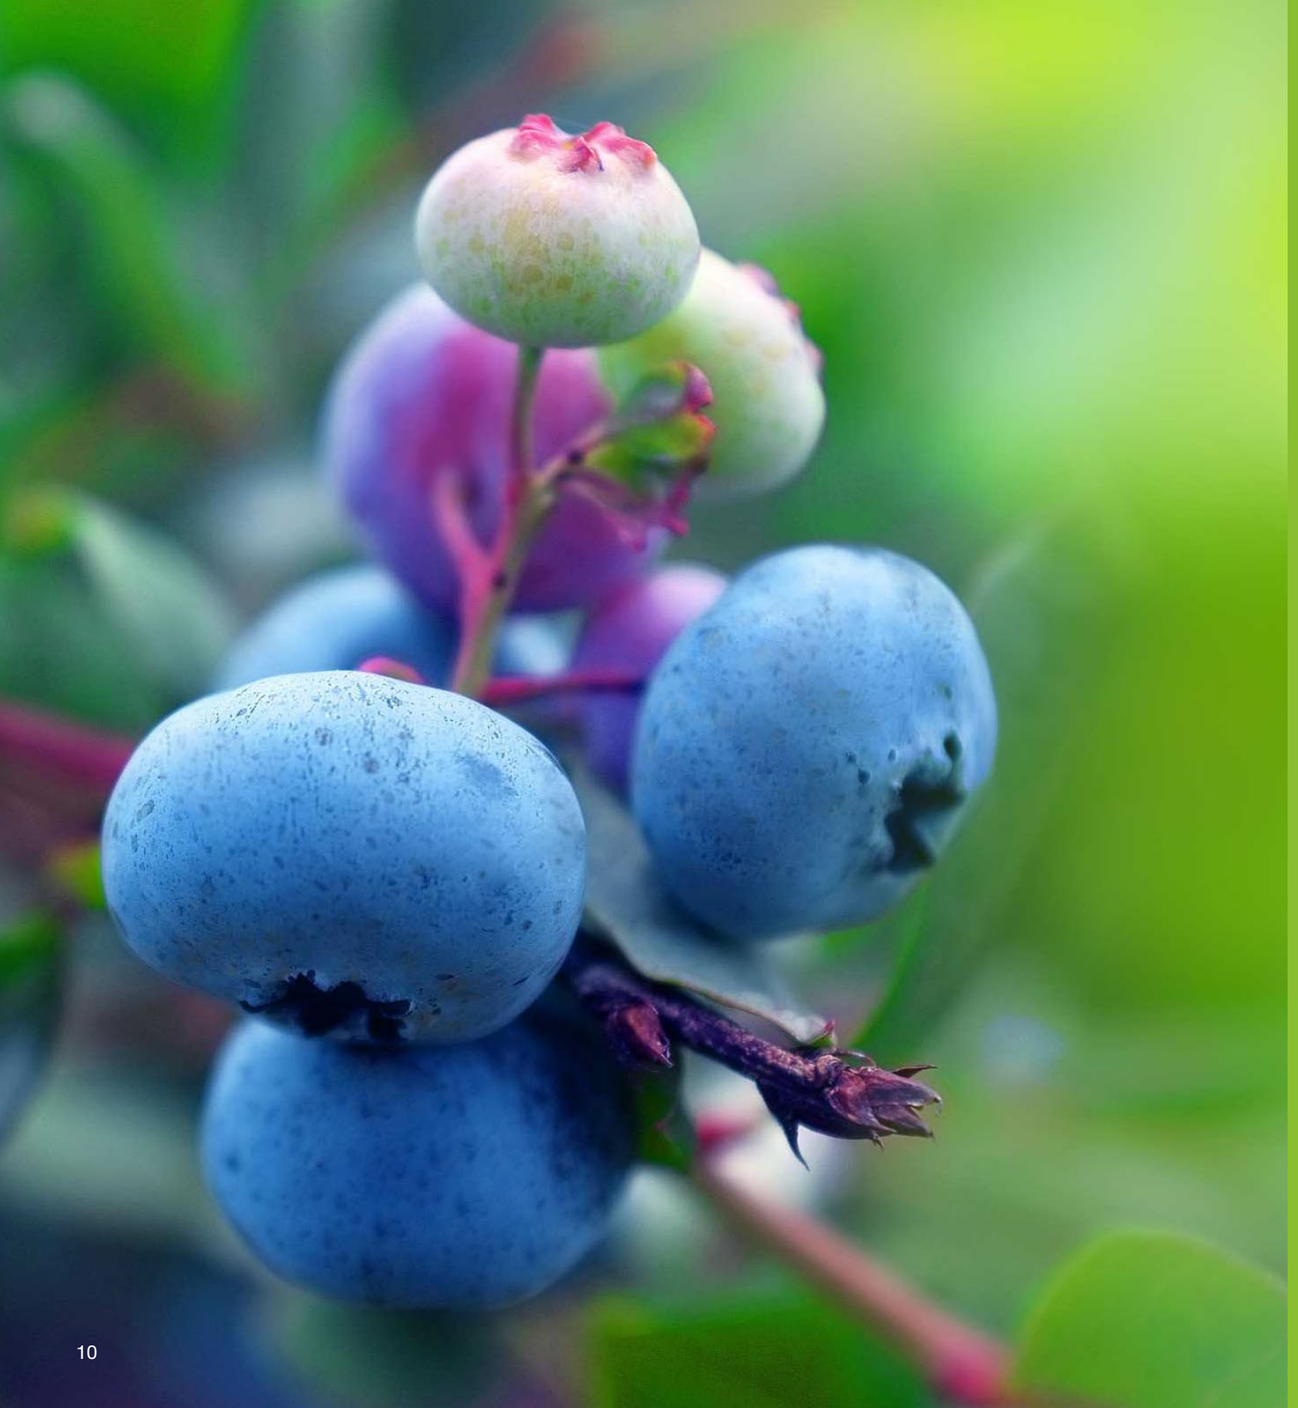

Regarding production: Raspberry production in Ukraine in 2024 is estimated at 65,000–70,000 tons annually, including household and unregistered production. Blueberry production is also growing, supported by export volumes of approximately 5,000 tons. Other trends: Almost all exported raspberries are shipped in frozen form; fresh exports are minimal or niche. The blueberry market is experiencing both volume growth and higher export prices. In 2024, Ukraine's blueberry exports generated approximately $26 million, an increase of 56% compared to the previous year.

FRESH BERRIES

BLUEBERRY BAY, FE

Founded in 2021

certification: Global G.A.P., Grasp (in progress)

BLUEBERRY BAY is a berry-growing enterprise founded in 2021. Since then, it has been cultivating high-quality blueberries on a 20-hectare area in Western Ukraine.

To ensure the best offerings for our buyers, we've planted six blueberry varieties: Duke, Bluegold, Bluecrop, Chandler, Darrow, and Elliott, selected for their compatibility with our terroir and their ability to provide a continuous supply from early to late season.

In the coming two years, the company aims to expand by planting 20 more hectares with new, carefully selected blueberry varieties.

GOLDBERRY, LLC

Founded in 2017

GREEN GRACE

certification: HACCP BRC

We are a producer of fresh and IQF frozen berry and vegetable products. We are the company «GOLDBERRY» with the trademark GREENGRACE. Our company is a leading producer of high-quality berries, specializing in the cultivation of strawberries and raspberries on 45 hectares of fertile land in the Kyiv region, Obukhiv district. Since our inception in 2017, we have quickly become known for our commitment to excellence, use of modern agricultural technologies, and responsible business practices.

We started our activities with a clear goal — to create an enterprise that not only produces delicious and healthy berries but does so in harmony with nature. Our success is based on three core principles: quality, innovation, and sustainability.

Orniberry™

Founded in 2018

ORNIBERRY

certification:
HACCP, ISO 22000, ISO 9000,
Global G.A.P., G.R.A.S.P.

The heart of Ukraine's Cherkasy region, Orniberry Farm sprawls across 100 hectares of prime agricultural land. Our journey began in 2018 when we planted the first batch of bushes, covering an initial 12 hectares.

The farm holds Global G.A.P. and G.R.A.S.P. certificates, updated annually since 2022.

To date, Orniberry Farm has successfully harvested over 1200 tons of premium blueberries. This impressive yield is a testament to our focus on quality farming practices and efficient agricultural management.

SEASON 2026

Union of Blueberry Producers and Exporters (UBPE)

BLUEBERRIES FROM UKRAINE

certification: Global G.A.P

To solve the issue of entering foreign markets with Ukrainian blueberries, the Union of Blueberry Producers and Exporters (UBPE) was created. This is a non-profit organization whose purpose is to promote the interests of farmers in foreign markets and help organize the export of blueberries to other countries. countries Our goal is to provide access to small and medium-sized blueberry producers to European and other sales markets, by raising production standards, unifying the issues of the use of plant protection products during cultivation, issues of cooling and storage of berries, as well as by organizing joint batches for sending berries for export.

WEST BERRY, LLC

Founded in 2016

certification:
Organic, FSSC 22000, Kosher

“WEST BERRY” LLC was founded in 2016. Every year, we increase the volume of berry harvesting, processing (freezing, sorting), and export. This has been made possible by expanding our production facilities (blast freezers, cold storage units, and warehouses), as well as by acquiring state-of-the-art processing and sorting lines.

Thanks to our team’s efforts, we have expanded the geographic reach of our finished product customers to include nearly all European countries. Our own specialized fleet enables us to transport berries promptly upon purchase and to deliver frozen berries quickly and reliably for export shipments. All these factors combined have allowed us to become one of the largest purchasers, processors, and exporters of frozen berries in western Ukraine.

Amethyst-Ole, LLC

Founded in 2011

Amethyst-Ole is an established Ukrainian producer and supplier of IQF berries, serving European customers since 2011. The company's production facility is located in the Zhytomyr region, close to some of Ukraine's most important wild berry harvesting areas.

The company sources berries across Zhytomyr, Khmelnytskyi, Vinnytsia, Rivne and Volyn regions, as well as selected wild blueberries from the Carpathians for customers with specific quality requirements.

With a processing capacity of up to 30 tons per day, freezing capacity of 48 tons and cold-storage capacity of up to 1,170 tons, Amethyst-Ole combines modern production capabilities with reliable supply and consistent quality.

The facility is equipped with advanced processing technology and supported by a team of 50+ employees. Amethyst-Ole is particularly proud of its custom-built 360° optical sorting system, designed specifically for the company to provide highly accurate sorting and consistently high product quality.

In 2013, Amethyst-Ole became the first company in Ukraine to obtain Naturland certification and maintained it continuously for 13 years, through 2025. Although the certification is currently paused due to the operational challenges caused by the war, the principles behind it — responsible sourcing, product integrity and high production standards — remain firmly embedded in the company's operations.

Throughout the war, Amethyst-Ole has continued to operate, support its team and partners, fulfil customer commitments and maintain reliable supply to European markets. The company's focus remains unchanged: quality, responsibility, continuity and long-term partnership.

BERRIES AND FRUITS, LLC

Founded in 2020

Berries and Fruits LLC was established in 2020. The company specializes in the processing, deep freezing, and storage of berries, fruits, and vegetables. The facility employs modern refrigeration technologies using CO_2 as a natural refrigerant. It is equipped with cold storage chambers that maintain the required temperature conditions for product storage. To ensure the continuity of production processes, the company uses alternative energy sources, including solar power generation and backup power systems. The company provides storage services for both its own products and those of its customers. A quality management system compliant with BRC Global Standards has been implemented, ensuring product quality control and traceability at all stages.

Faina Poliana, AC

Founded in 2015

certification: HACCP, ISO 22000

Faina Poliana Agricultural Cooperative was founded by local family farms based on the principles of the European cooperative model. Today, the cooperative brings together more than 150 members from ten territorial communities in the Ternopil and Ivano-Frankivsk regions of Ukraine.

Faina Poliana specializes in the production, processing, freezing and export of berries and other agricultural products. The cooperative operates its own processing and freezing facilities and continuously invests in expanding production capacity and its range of frozen products.

By combining the production of family farms with centralized processing and export operations, Faina Poliana creates added value for its members and ensures consistent quality and reliable supply for international buyers.

Faina Poliana is a reliable Ukrainian partner for the supply of high-quality frozen berries to international markets, offering stable cooperation, professional processing and export-ready products.

Sav Agro Partner, LLC

Founded in 2017

The company “SAV AGRO PARTNER” was founded in 2017, specializing in the cultivation and furtherfreezing and sale of vegetables and berries.

Our production is grown on the fertile lands of Volyn region, the total land bank of which is more than 150 hectares. Due to the close cooperation with “ORGANIC STANDART” our company has been certified as an organic producer, which means that the constant control that is introduced at all stages of growing and processing of fruits gives a guarantee in the safety and environmental friendliness of our products. In the process of cultivation and processing modern agrarian and industrial technologies are used. The close proximity to the European border can significantly reduce transport costs and time when exporting products.

TORIS, LLC

Founded in 1993

TORIS LLC
frozen manufacturer

certification: ORGANIC; HACCP; ISO 22000;

Family production enterprise Toris LLC was founded in 1997 in the Volyn region in Ukraine. Favorable location in an ecologically friendly forest area allows us to have our own and permanent suppliers of fresh raw products. For many years we have been supplying products to European countries: Poland, Czech Republic, Latvia and Lithuania. We use the best technology of shock freezing of fruits and berries IQF (Individual quick freezing technology for berries) which allows us to freeze quickly fresh raw products and preserve nutritional properties and ensure bacteriological purity.

Yarofruit

Founded in 2016

YAROFRUIT
FROZEN BERRIES AND VEGETABLES

certification:
ORGANIC, BRC, IFSSC 22000

YAROFRUIT is one of Ukraine's leading producers and exporters of frozen berries, fruits and vegetables. We combine years of experience with modern processing technologies to ensure consistent product quality and food safety at every stage.

Our products undergo careful quality control throughout the production process, while shock freezing helps preserve their natural taste, color and texture. Our facility is equipped with two Buhler SORTEX optical sorters, three Ferrum pitting machines and an Urschel 3D dicing machine, as well as packaging, cleaning, polishing, inspection and grading equipment.

Our production follows HACCP standards and is certified according to BRC and FSSC 22000 requirements. We are also certified Organic, and each batch undergoes laboratory testing to ensure compliance with our quality and food safety requirements.

Lantmannen AXA, PrJSC

Founded in 1990

certification: BRCGS v9, HALAL

Lantmannen AXA has been a leader in the Ukrainian breakfast cereal market for many years, and we have been actively exporting our delicious product. We are a Ukrainian manufacturer with Swedish quality traditions. In the production of food products, the main principles of Lantmannen's work are high quality and naturalness of raw materials and output without artificial additives and preservatives. It is no coincidence that the symbol of Lantmannen is a sprout - a sign of life. After all, we take the most valuable things from the earth and create conditions for a whole life by producing safe and high-quality food products. Our product range includes cereals, instant cereals, wholemeal bars, various breakfast cereals, granola, Finn Crisp, and salty cereals.

Three Bears, LLC

Founded in 1998

Three Bears

certification:
ISO 22000, HACCP, FSSC, HALAL, BRC

Three Bears Group is an international producer of ice cream and frozen foods with nearly 30 years of experience. The company operates two modern production facilities in Ukraine (Three Bears) and Poland (Nordis).

Our portfolio includes a wide range of ice cream formats: family-size tubs and trays, sticks, cones, cups, bricks, and multipacks.

Since 2016, we have expanded our exports to over 30 countries across four continents.

Our facilities are ISO 22000, Halal, and BRCGS certified. We offer flexible private-label solutions, while our two production sites ensure reliable supply and on-time delivery.
